

AWS™ Joist Plate System— *Enjoy a New Look for your Yard!*

*We are helping to “Green” America! The AWS™ Pedestal System was developed and patented by contractor-installers, who found pedestal systems were cumbersome, expensive, and difficult to install. The snap-together AWS™ Pedestal System with its **Joist Plate System** (here shown) for architectural slabs and other gauged materials are being used over the existing joists of a tired old deck to bring new Life into a favorite yard. See why our Pedestals and Joist Plates are being used throughout the United States by contractors and homeowners alike to create inviting places to gather and stay.*

Turn an ordinary deck into an extraordinary new addition to your yard.
