

AWS™ introduces its new **Perimeter Pedestal**

Your project deserves a more professional edge piece. AWS™ Pedestal System now brings the answer to these difficult edging dilemmas with our new **Perimeter Pedestal™**. It snaps together similarly to the full pedestal system and to its component shim pieces. Always innovating, we strive to meet all the requirements of paving installations. AWS™ is the complete pedestal system for your needs.

*Strong.
Affordable.
Simple.
Always innovating.*

The AWS™ pedestal and the new **Perimeter Pedestal™** (patent pending) promotes a “green” environment. Sustainably designed, it is constructed of fully recyclable, durable ABS and PVC plastics and 100% recycled rubber for the Buffer Pad.

US Patent: 6,520,471 B2

The **Perimeter Pedestal™** uses Top Cap and Base Cap secured with 1-1/2” SCH40 DWV PVC to effectuate its elevation. Comprehensive tested to 10” at 15,000 PSI.

AWS™ pedestals use SDR35 4” PVC tested to 20” at 13,000 PSI.
